# Automotive Technology

## *What it is...*

Automobiles are something we depend on in everyday life. Anyone whose car has broken down understands the importance of the auto technician's job. The ability to make a quick and accurate diagnosis is one of the technician's valuable skills. It requires good reasoning ability and a thorough knowledge of automobiles. Specialized classroom and shop experiences are designed to provide instruction in all critical systems and components of automobiles with state of the art equipment.. This program is working on becoming A.S.E. certified. Students are taught to use service and technical manuals, and online software. We are also preparing students to participate in the Pennsylvania State Inspection Certification Program. Also when enrolled in the Automotive program you will be able to participate in Skills USA, which is a Career and Technical student organization in which you can gain valuable skills such as Teamwork, Leadership and Career building. Come join our team. We will steer you in the right direction.
